

Prepare for Rising Rates

Lock in a Low Rate Today on an Advance That Settles in the Future

A Forward-Starting advance enables a member to take advantage of the current low-interest rate environment by locking in a rate today for an advance that settles at a future date. A Forward-Starting advance could be beneficial for members who currently have sufficient liquidity but would like to take advantage of historically low rates, and prepare for potential rising rates in a strengthening economy.

BENEFITS

- Replace brokered CD funds with more competitively priced FHLB of Dallas funds
- Match-fund and hedge against future rate increases
- Prepare for a rising-rate market environment
- Lock in rates today to renew future maturing advances

When to Consider a Forward-Starting Advance?

Your view is that future rates will be higher than the forward rates already implied by the advances curve.
