

## FORTIFIED Fund Rental Program Scoring Rubric

The Bank’s FORTIFIED Fund Rental Program operates through a Bank District-wide competition. Applications are scored according to the criteria outlined below. After scoring, applications are ranked in descending order. The highest scoring application submitted from each state will be approved and all remaining applications will be approved in order of highest to lowest score until funds are exhausted.

All applicants will compete for the available funds based on the ability of each applicant's project to meet minimum eligibility requirements and the Bank’s scoring guidelines below in relation to other submitted projects. The Bank, following an initial scoring of submitted applications, may review only the applications that score high enough to be awarded funds, plus the Bank may in its discretion review a number of additional applications, to determine if those applications meet the minimum eligibility requirements detailed in the application. Scoring determinations and final approval of submitted applications is at the sole discretion of FHLB Dallas.

## Tie Breaker:

If after ranking all applications from highest to lowest score, if two or more applications receive identical scores and there are insufficient funds remaining, the Bank will adhere to the following tie-breaking methodology to determine the project(s) to be awarded:

The Bank will compare FEMA disaster likelihood for Hurricane, Strong Wind, Hail, and Tornado. Projects with Very High likelihoods for any of the disasters above will be approved, followed by projects with Relatively High likelihoods, followed by projects with Relatively Moderate likelihoods.

If any of the remaining applications’ scores are still tied and the requested amount of each remaining application is within the amount of FORTIFIED funds remaining to be awarded, then the approved project(s) will be randomly selected via lottery.
